Rice Processing Plant.

The plant was installed by the shipper with equipment sourced from a local vendor. The machinery utilized is manufactured in China (as declared). The sorting machine employed is a Chinese brand-named TAI HO (as mentioned).

As per the client, since the construction of the mill in 2019, they have only processed IRRI 6 variety of rice. They have the complete setup for the initial de-husking of IRRI 6 and then milling it as observed.

Reference images of the processing plant are attached below for reference.

Production Capacity	
Plant capacity for silky rice 5%	05 Tons per hour
Plant capacity for silky rice broken	1.5 Tons per hour

Storage tanks.

For the storage of processed rice, there were three storage tanks present. Two for head rice and one for broken rice. The storage capacities declared are as follows and the Reference images of the storage tanks are attached below for reference.

Storage Tank Capacity	
Number of Tanks :	03 storage tanks to store final processed cargo
02 Storage Tanks for final :	Each having storage capacity of 40 Tons
01 Storage Tank for Broken :	Have storage capacity of 30 Tons

Warehouse details:

For the storage of the final processed cargo in PP bags, a separate warehouse portion is available beside the milling plant. In the final warehouse area on the left side, there was no proper wall separating the storage of processed rice bags from the heap of raw rice used for milling. The final processed cargo after milling and the unmilled cargo in heap condition are kept in the same place. The capacity of the storage warehouse and images are as follows.

Warehouse Capacity declared	
Final warehouse Capacity	10,000 bags of 50 kg
Raw warehouse Capacity	50,000 bags of 50 kg
